Lobo Top 40 Player Briefing

Use this quick reference with the player briefing video to prepare, schedule and report each match.

Event basics

- 25 players. Registration is closed. Every game is played at 300 points.
- Seeding uses Infinity the Meta ratings, with Commissioner placements for unrated players.
- The 32-position bracket gives the seven highest seeds an opening bye and creates nine opening matches. A bye advances you automatically; there is no game to arrange or report.
- Planned opening: November 1, 2026 at 9:00 a.m. Eastern. The Organizer releases the opening matches manually.

How the bracket works

- Everyone starts in the Winners Bracket. Your first loss moves you to the Losers Bracket.
- Your second match loss eliminates you, wherever it happens.
- Open the Top 40 event page and select Bracket. Play only after your matchup is confirmed and active.

Armies and lists

- **You may change your army and your army list between rounds. You do not have to use the same army or list throughout the tournament.**
- Keep every list within the 300-point limit.

Mission and map

- Check the mission and map for your specific bracket and round; Winners and Losers assignments differ.
- Opening mission: Corporate Appropriation. Opening map: Lobo Tourney Map 1, Asterion Research Campus.
- Use the event overview for the full rotation, assigned map links and Mission Geist rules. Map 1 offers a saved-object download and a Windows installer.
- Load the map through the table map loader. Use Deployment and Mission controls, then confirm terrain rules and objective positions with your opponent.

Scheduling your match

- You receive at least seven full days from the time your match becomes active. Check the exact deadline on the portal.
- Contact your opponent promptly and agree on a time. Later matches activate separately and can have different deadlines.
- Contact the Organizer early if scheduling is difficult or your opponent is not responding. The Organizer handles defaults, forfeits, missed deadlines and scheduling disputes.

Report the game

- Agree on the result and scores with your opponent before submitting.
- On the portal, select Submit Game, then Submit Top 40 Game.
- Select both players and the correct mission. Enter both armies and army codes, who took first turn, the result, and both players' Tournament Points, Objective Points and Victory Points.
- Every bracket match needs a winner. If the game is drawn, Victory Points decide the winner. If Victory Points are also tied, contact the Organizer for a ruling.
- After the result is processed, check the bracket for your next matchup.

Grand Final

- The Winners Bracket finalist faces the Losers Bracket finalist.
- The unbeaten finalist needs one win to become champion.
- If the Losers finalist wins the first final, both finalists have one loss. Play a reset final; its winner takes the title.

Before your first game

- Find your matchup. Read the assigned mission. Contact your opponent.
