Territory & Terrain Guide

24 location artworks / 12 territories / 48 Frontline and Supremacy setups

Artwork refreshed from the current map geometry and placements. Each location uses one shared concept illustration for both missions. The images are artistic interpretations, not TTS screenshots or exact measurement diagrams.

Find your territory

Nova Prospect 2
Administrative District / Orbital Logistics District

Korin Range 3
Research Valley / High Pass

Crystal Frontier 4
Faultline Works / Rift Research Station

Echo Shores 5
Dockside Operations / Freeport Echo

Harmony Province 6
Civic Gardens / Courtyard District

Verde Wilds 7
Greenwood Station Jungle Outpost / Greenwood River Crossing

Azure Coast 8
Coastal Access / Tidal Infrastructure

Ember Highlands 9
Red Mesa Settlement / Geothermal Works

Sulfur Basin 10
Helios Refinery / Helios Extraction Fields

Frostreach Wastes 11
Frosthold Wastes / Polar Expedition Zone

Northward Expanse 12
New Al-Medina Research Network / Northern Survey Frontier

Iron Corridor 13
Iron Junction Freight Yard / Transit & Maintenance Hub

Read the current Territory Special Rules

Nova Prospect

Colonial capital and orbital logistics. Permanent civic buildings, communications, and developed streets.

Administrative District

SET_Nova Prospect · Administrative District · Frontline

SET_Nova Prospect · Administrative District · Supremacy

Orbital Logistics District

SET_Nova Prospect · Orbital Logistics District · Frontline

SET_Nova Prospect · Orbital Logistics District · Supremacy

Use substantial civic buildings to break streets and sightlines. Keep warehouses and freight routes broad enough for TAGs. Cargo and vehicles supplement buildings rather than replacing them.

TERRITORY 02 / Dragon Gate Enclave

Korin Range

A mountain research region defined by cliffs, ridges, bridges, and high passes.

Research Valley

SET_Korin Range · Research Valley · Frontline

SET_Korin Range · Research Valley · Supremacy

High Pass

SET_Korin Range · High Pass · Frontline

SET_Korin Range · High Pass · Supremacy

Integrate irregular research structures into natural terrain. Provide several approaches through, under, or around ridges. A bridge or pass must never be the only route.

View location and mission options

View location and mission options

TERRITORY 03 / Crystal Reach

Crystal Frontier

A mineral frontier of fractured quarry terraces, blue-grey crystal ravines, extraction works, and scattered research facilities.

Faultline Works

SET_Crystal Frontier · Faultline Works · Frontline

SET_Crystal Frontier · Faultline Works · Supremacy

Rift Research Station

SET_Crystal Frontier · Rift Research Station · Frontline

SET_Crystal Frontier · Rift Research Station · Supremacy

Use substantial quarry faces, workshops, laboratories, and crystal-bearing rock as Line of Fire blockers. Keep the diagonal ravine ends inside the board, with several clear bridge crossings and routes around its ends. Preserve protected approaches, broad access cuts, and usable midfield objective space.

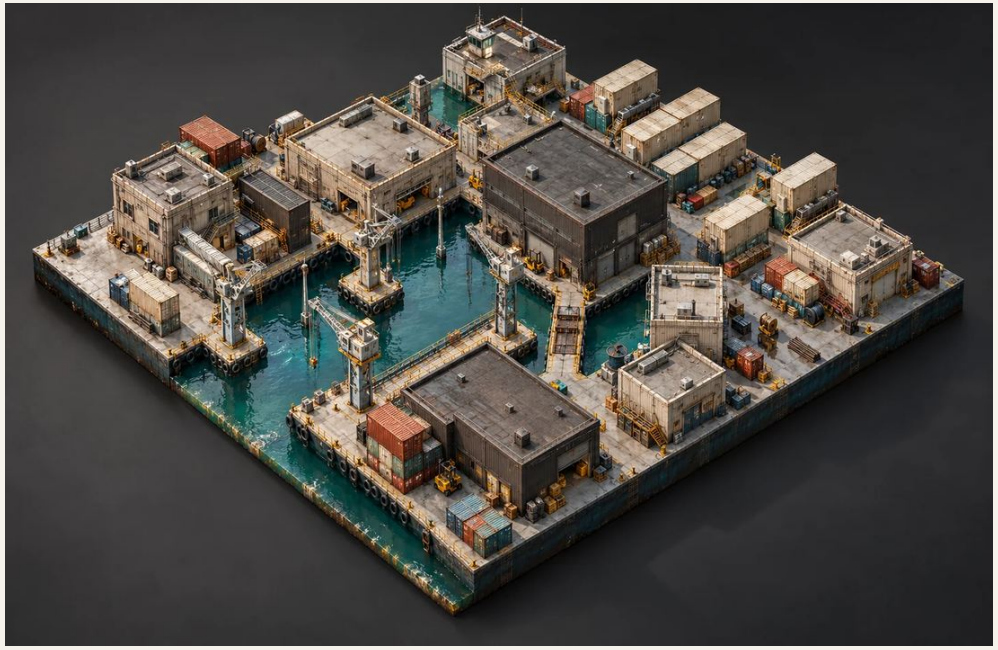

View location and mission options

View location and mission options

Echo Shores

An improvised coastal trade zone of docks, cranes, warehouses, markets, and independent commerce.

Dockside Operations

SET_Echo Shores · Dockside Operations · Frontline

SET_Echo Shores · Dockside Operations · Supremacy

Freeport Echo

SET_Echo Shores · Freeport Echo · Frontline

SET_Echo Shores · Freeport Echo · Supremacy

Dockside Operations retains its working harbor; Freeport Echo is entirely dry land on four continuous terraces. Provide protected dock crossings and interconnected streets across Freeport Echo’s west-to-east terraces. Stalls, awnings, and cargo provide texture; major structures control sightlines.

View location and mission options

View location and mission options

Harmony Province

An ordered civic center with planned public spaces, government architecture, and O-12 security infrastructure.

Civic Gardens

SET_Harmony Province · Civic Gardens · Frontline

SET_Harmony Province · Civic Gardens · Supremacy

Courtyard District

SET_Harmony Province · Courtyard District · Frontline

SET_Harmony Province · Courtyard District · Supremacy

Preserve meaningful open civic space. Use monuments, planters, and offset structures for staged cover. Distribute specialized institutions instead of building one giant headquarters.

TERRITORY 06 / Greenwood Station

Verde Wilds

Equatorial wilderness where research outposts and expedition routes are swallowed by jungle and waterways.

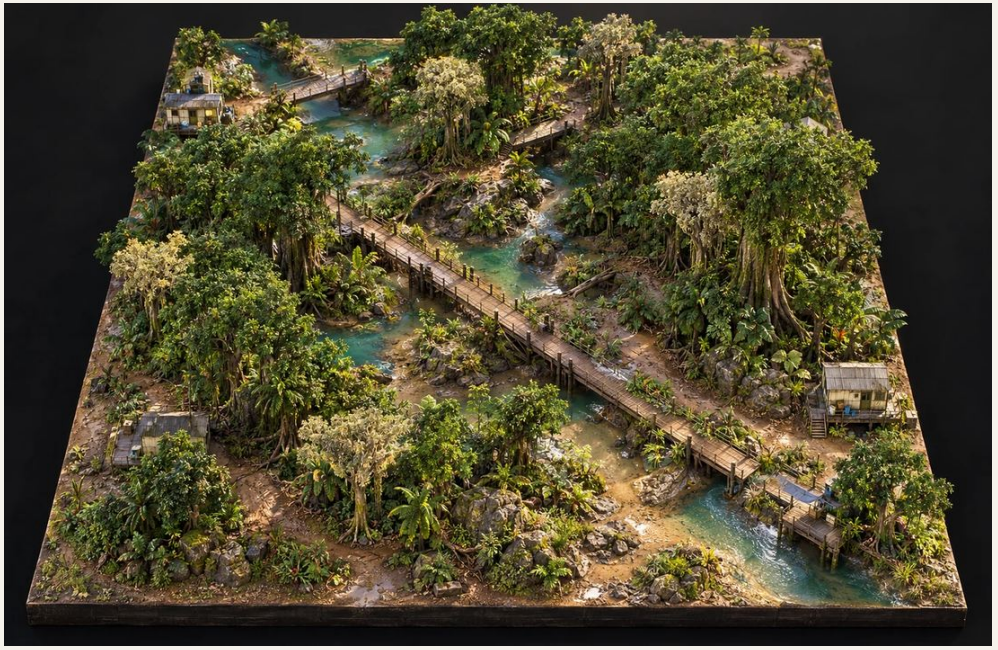

Greenwood Station Jungle Outpost

SET_Verde Wilds · Greenwood Station Jungle Outpost · Frontline

SET_Verde Wilds · Greenwood Station Jungle Outpost · Supremacy

Greenwood River Crossing

SET_Verde Wilds · Greenwood River Crossing · Frontline

SET_Verde Wilds · Greenwood River Crossing · Supremacy

Natural jungle and rock masses dominate the table. Keep scientific buildings scattered and routes broad enough for large models. Use several river crossings and preserve the water-network identity.

View location and mission options

View location and mission options

Azure Coast

Modern maritime logistics: clean port infrastructure, customs, maintenance, and intermodal transport.

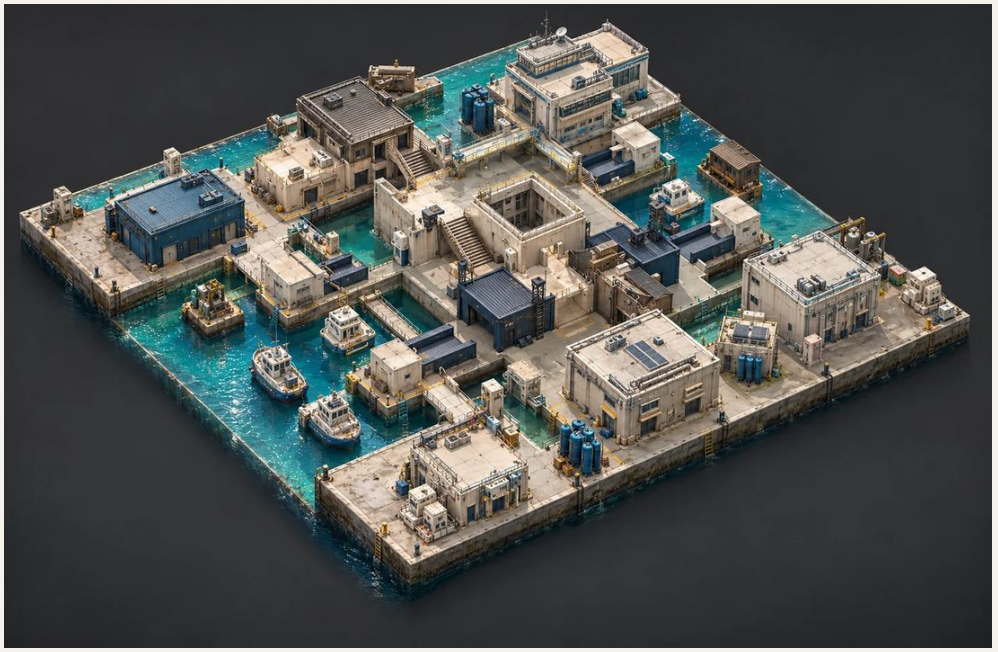

Coastal Access

SET_Azure Coast · Coastal Access · Frontline

SET_Azure Coast · Coastal Access · Supremacy

Tidal Infrastructure

SET_Azure Coast · Tidal Infrastructure · Frontline

SET_Azure Coast · Tidal Infrastructure · Supremacy

Retain the harbor edge while leaving ample playable land. Interrupt broad roads with customs buildings and cargo compounds. Keep inland terminal terrain focused on road logistics, distinct from Echo Shores.

View location and mission options

View location and mission options

Ember Highlands

A volcanic highland frontier of dark red rock, monumental mesas, remote habitation, and geothermal activity.

Red Mesa Settlement

SET_Ember Highlands · Red Mesa Settlement · Frontline

SET_Ember Highlands · Red Mesa Settlement · Supremacy

Geothermal Works

SET_Ember Highlands · Geothermal Works · Frontline

SET_Ember Highlands · Geothermal Works · Supremacy

Geology dominates small settlement and utility buildings. Provide branching canyon routes around enormous mesas. Geothermal pipes remain broken and crossable.

View location and mission options

View location and mission options

Sulfur Basin

A chemically scarred industrial territory ranging from dense refineries to exposed sulfur extraction fields.

Helios Refinery

SET_Sulfur Basin · Helios Refinery · Frontline

SET_Sulfur Basin · Helios Refinery · Supremacy

Helios Extraction Fields

SET_Sulfur Basin · Helios Extraction Fields · Frontline

SET_Sulfur Basin · Helios Extraction Fields · Supremacy

Distribute refinery masses rather than relying on one central complex. Keep pipe networks crossable with multiple TAG-capable routes. Extraction fields use substantial natural blockers with secondary machinery.

View location and mission options

View location and mission options

Frostreach Wastes

A polar frontier of glaciers, snowfields, survival installations, and isolated expedition sites.

Frosthold Wastes

SET_Frostreach Wastes · Frosthold Wastes R25 · Frontline

SET_Frostreach Wastes · Frosthold Wastes R25 · Supremacy

Polar Expedition Zone

SET_Frostreach Wastes · Polar Expedition Zone R25 · Frontline

SET_Frostreach Wastes · Polar Expedition Zone R25 · Supremacy

Large ice and rock masses provide primary Line of Fire blocking. Keep survival infrastructure compact and subordinate to the frozen landscape. Open expedition terrain still needs protected, tactically crossable approaches.

View location and mission options

View location and mission options

Northward Expanse

A dry scientific frontier, from permanent research networks to temporary camps at the edge of mapped territory.

New Al-Medina Research Network

SET_Northward Expanse · New Al-Medina Research Network · Frontline

SET_Northward Expanse · New Al-Medina Research Network · Supremacy

Northern Survey Frontier

SET_Northward Expanse · Northern Survey Frontier · Frontline

SET_Northward Expanse · Northern Survey Frontier · Supremacy

Natural ridges and outcrops form the principal battlefield terrain. Use distinct research functions rather than repeated prefab buildings. Northern survey terrain is more isolated, with minimal temporary infrastructure.

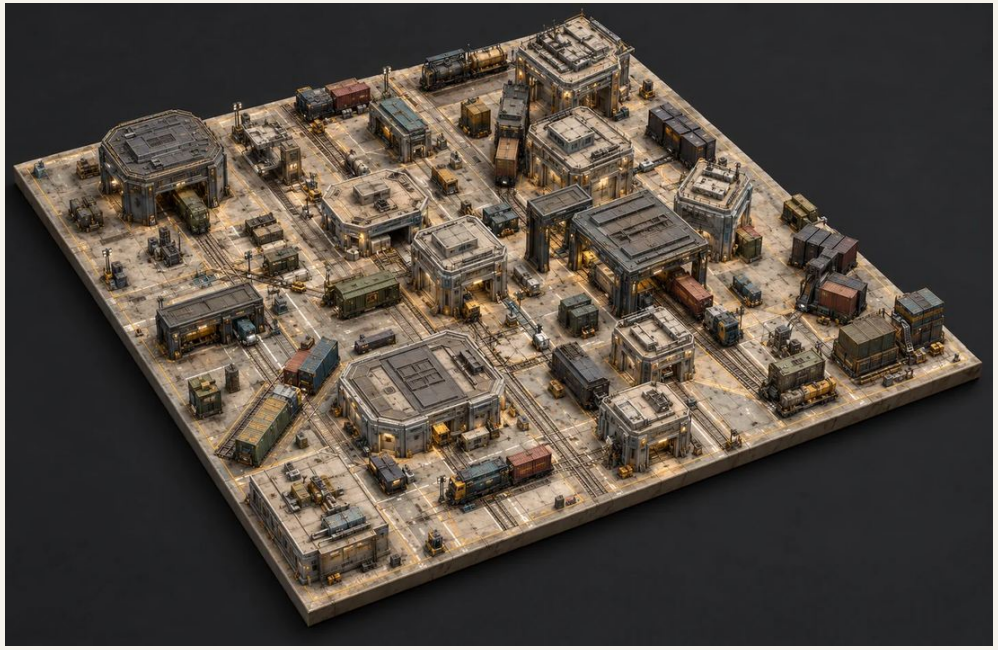

View location and mission options

Iron Corridor

A heavy rail region of freight switching, cargo transfer, inspection, maintenance, and transit services.

Iron Junction Freight Yard

SET_Iron Corridor · Iron Junction Freight Yard · Frontline

SET_Iron Corridor · Iron Junction Freight Yard · Supremacy

Transit & Maintenance Hub

SET_Iron Corridor · Transit & Maintenance Hub · Frontline

SET_Iron Corridor · Transit & Maintenance Hub · Supremacy

Rail lines weave through terrain with many broad crossings. Distributed facilities and freight buildings provide substantial cover. Avoid a giant central terminal or rail barrier dividing the table.

View location and mission options

Build for the mission

Start with a balanced 48-inch table.

Keep substantial cover in both deployment zones and several protected exits. Check movement for a whole army, including larger Silhouettes.

Preserve the location character.

Use the new images for terrain type, density, broad elevation and architectural identity. Measurements, exact model locations and building-state interactions come from the loaded map and the mission rules.

Keep routes and objectives usable.

Provide connected lateral and diagonal approaches, more than one route onto elevated areas, clear bridge landings and accessible objective positions. Agree terrain boundaries and elevations before deployment.

Use the matching mission setup.

Frontline and Supremacy share a location artwork. Select the correct mission bag in the portal; Supremacy consoles and other mission-specific pieces are defined by that setup.

Use the current published rules.

The artwork introduces no additional permissions, terrain effects or owner advantages. Read the Territory Special Rules for Aerial exceptions, Frostreach blizzards and all other campaign effects.
